```
import { getSettings, getUser } from
'./storage';

// عدّل الرابط إلى الخادم حقك (انظر README و server-
example.js)
const REPORT_URL = 'https://YOUR-
SERVER.example.com/daily-report';

export async function sendReport(payload) {
  const { reportEmail, beneficiaryNumber }
= await getSettings();
  const user = await getUser();
  if (!reportEmail) return;
  await fetch(REPORT_URL, {
    method: 'POST',
    headers: { 'Content-Type':
'application/json' },
    body: JSON.stringify({ to: reportEmail,
beneficiaryNumber, user: user?.name,
...payload, at: new Date().toISOString()
}),
  });
}
```
